

Cloud Computing MCQ for ITI COPA

1. Which of the following is not a type of cloud server?

- a) Public Cloud Servers b) Private Cloud Servers
- c) Dedicated Cloud Servers d) Merged Cloud Servers

Ans. d

2. Which of the following is a type of cloud computing service?

- a) Service-as-a-Software (SaaS) b) Software-and-a-Server (SaaS)
- c) Software-as-a-Service (SaaS) d) Software-as-a-Server (SaaS)

Ans. c

3. Which of the following is the application of cloud computing?

- a) Adobe b) Paypal c) Google G Suite d) All of the above

Ans. d

4. Which of the following is an example of the cloud?

- a) Amazon Web Services (AWS)
- b) Dropbox
- c) Cisco WebEx
- d) All of the above

Ans. d

5. Which of the following is an example of a PaaS cloud service?

- a) Heroku
- b) AWS Elastic Beanstalk
- c) Windows Azure
- d) All of the above

Answer: d

Explanation: PaaS stands for Platform-as-a-Service. In PaaS, the users receive hardware or software tools from the users on the internet. AWS Elastic Beanstalk, Windows Azure, Heroku are example of a PaaS service.

6. Which of the following is an example of an IaaS Cloud service?

- a) DigitalOcean
- b) Linode
- c) Rackspace
- d) All of the above

Answer: d

Explanation: IaaS stands for Infrastructure-as-a-Service. In IaaS, the users receive computing resources like software or hardware tools virtually over the internet. DigitalOcean, Linode, Rackspace are the example of an IaaS service.

7. Which of the following is the correct statement about cloud computing?

- a) Cloud computing abstracts systems by pooling and sharing resources
- b) Cloud computing is nothing more than the Internet
- c) The use of the word "cloud" makes reference to the two essential concepts
- d) All of the mentioned

Ans. a

8. Point out the wrong statement.

- a) Azure enables .NET Framework applications to run over the Internet
- b) Cloud Computing has two distinct sets of models
- c) Amazon has built a worldwide network of datacenters to service its search engine
- d) None of the mentioned

Ans. c

9. Which of the following model attempts to categorize a cloud network based on four dimensional factors?

- a) Cloud Cube
- b) Cloud Square
- c) Cloud Service
- d) All of the mentioned

Ans. a

10. Which of the following is the correct statement about cloud types?

- a) Cloud Square Model is meant to show is that the traditional notion of a network boundary being the network's firewall no longer applies in cloud computing
- b) A deployment model defines the purpose of the cloud and the nature of how the cloud is located
- c) Service model defines the purpose of the cloud and the nature of how the cloud is located
- d) All of the mentioned

Ans. b

11. Which architectural layer is used as a backend in cloud computing?

- a) cloud
- b) soft
- c) client
- d) all of the mentioned

Ans. a

12. Which of the following architectural standards is working with cloud computing industry?

- a) Web-application frameworks
- b) Service-oriented architecture
- c) Standardized Web services
- d) All of the mentioned

Ans. b

13. Which of the following is the correct statement?

- a) Cloud computing presents new opportunities to users and developers
- b) Service Level Agreements (SLAs) is small aspect of cloud computing
- c) Cloud computing does not have impact on software licensing
- d) All of the mentioned

Ans. a

14. Which of the following is the wrong statement about cloud computing?

- a) Private cloud doesn't employ the same level of virtualization
- b) Data center operates under average loads
- c) Private cloud doesn't pooling of resources that a cloud computing provider can achieve
- d) Abstraction enables the key benefit of cloud computing: shared, ubiquitous access

Ans. a

15. Identify the correct statement about cloud computing.

- a) Cloud computing relies on a set of protocols needed to manage interprocess communications
- b) Platforms are used to create more complex software
- c) Cloud architecture can couple software running on virtualized hardware in multiple locations to provide an on-demand service
- d) All of the mentioned

Ans. d

16. Which of the following is required by Cloud Computing?

- a) That the identity be authenticated
- b) That the authentication be portable
- c) That you establish an identity
- d) All of the mentioned

Ans. d

17. Cloud computing is a concept that involves pooling physical resources and offering them as which sort of resource?

- a) cloud
- b) real
- c) virtual
- d) none of the mentioned

Ans. c

18. Which of the following is the most essential element in cloud computing by CSA?

- a) Virtualization
- b) Multi-tenancy
- c) Identity and access management
- d) All of the mentioned

Ans. b

19. Which of the following is the most refined and restrictive cloud service model?

- a) PaaS
- b) IaaS
- c) SaaS
- d) CaaS

Ans. a

20. Which of the following is not a property of cloud computing?

- a) virtualization
- b) composability
- c) scalability
- d) all of the mentioned

Ans. b

21. How many phases are there in Cloud Computing Planning?

- a) 1
- b) 5
- c) 3
- d) 6

Answer: c

Explanation: Strategy Phase, Planning Phase, and Deployment Phase are the three phases of Cloud Planning.

22. Which of the following is an example of a SaaS cloud service?

- a) Google Workspace
- b) Dropbox
- c) Salesforce
- d) All of the above

Ans. d

23. _____ computing refers to applications and services that run on a distributed network using virtualized resources.

- a) Distributed
- b) Cloud
- c) Soft
- d) Parallel

Ans. b

24. _____ has many of the characteristics of what is now being called cloud computing.

- a) Internet
- b) Softwares
- c) Web Service
- d) All of the mentioned

Ans. a

25. Which of the following can be identified as cloud?

- a) Web Applications b) Intranet
- c) Hadoop d) All of the mentioned

Ans. c

26. Identify the deployment model among the following.

- a) Private
- b) Public
- c) Hybrid
- d) All of these

Ans. d

27. Which of the following refers to network or internet?

- a) Cloud
- b) CRM
- c) Cloud computing
- d) Computing

Ans. c

28. Identify among the following, which are examples of IaaS cloud computing

- a) Linode
- b) Cisco meta cloud
- c) Digital ocean
- d) All of the above

Ans. d

29. Identify among the following, which are examples of SaaS cloud computing.

- a) Dropbox
- b) Salesforce
- c) Google Workshop
- d) All of the above

Ans. d

30. Identify among the following, which are example of PaaS cloud computing

- a) Heroku
- b) Google App Engine
- c) AWS Elastic Beanstalk
- d) All of these

Ans. d

31. In which year was Google Computer Engine released?

- a) 2012 b) 2009
- c) 2015 d) 2006

Ans. a

32. What is the most important concern of cloud computing?

- a) Cost b) Space c) Security d) Platform

Ans. c

33. Total types of cloud computing services are?

- a) 1 b) 2 c) 3 d) 4

Ans. d (There are a total of 4 cloud computing services - public, private, hybrid, multi-clouds.)

34. The term "hybrid cloud" refers to

- a) Private cloud
- b) Public cloud
- c) Combination of private and public cloud
- d) None

Ans. c

35. Identify the technique used for creating cloud computing.

- a) Insubordination
- b) Cannibalization
- c) Virtualization
- d) Transubstantiation

Ans. c

36. Total steps of deployment stage in cloud computing are

- a) 3 b) 4 c) 5 d) 6

Ans. b

37. SAN stands for _____

- a) Storage area network
- b) Security area network
- c) Switch application network
- d) None

Ans. a

38. Among the following, which provides the GUI for interaction with the cloud.

- a) Server
- b) Client
- c) Client infrastructure
- d) Application

Ans. c

39. QPS stands for _____

- a) Query period sites
- b) Quantum per second
- c) Quality Per service
- d) Query per second

Ans. d

40. Choose the most important use of cloud computing.

- a) Data privacy
- b) Data storage
- c) Cost effective
- d) Security

Ans. b

41. Identify the highest degree of integration of cloud computing.

- a) SaaS
- b) PaaS
- c) IaaS
- d) CaaS

Ans. a

42. What type of computing technology refers to services and applications that typically run on a distributed network through virtualized resources?

- a) Distributed computing
- b) Cloud computing
- c) Soft computing
- d) Parallel computing

Ans. b

43. Which feature of cloud computing allow user to release the resources as soon as they are not needed?

- a) Self-Service
- b) Per-Usage Metering and Billing
- c) Elasticity
- d) Customization

Ans. b

44. Which feature of cloud computing allow to add additional resources when an application load increase?

- a) Self-Service
- b) Per-Usage Metering and Billing
- c) Elasticity
- d) Customization

Ans. c

45. Which of the following is an advantage of Public Cloud?

- a) Performance depends on speed of internet
- b) Lacks proper control
- c) Scalability
- d) Customization is not possible

Ans. c

46. A _____ shares the cloud infrastructure across the several organizations that has a common concerns.

- a) Community Cloud
- b) Private Cloud
- c) Scalability of Cloud
- d) Public Cloud

Ans. a

47. Which one of the following has single tenancy?

- a) Private Cloud
- b) Public Cloud
- c) Hybrid Cloud
- d) None

Ans. a

48. In architecture of Cloud Computing, what refers to the side of computer user or client?

- a) Front End
- b) Back end
- c) Server Side
- d) Client Side

Ans. a

49. What is the key component of the cloud infrastructure?

- a) Hypervisor
- b) Network
- c) Server
- d) Storage

Ans. b

1. What is Cloud Computing?

- a) Cloud Computing means providing services like storage, servers, database, networking, etc
- b) Cloud Computing means storing data in a database
- c) Cloud Computing is a tool used to create an application
- d) None of the mentioned

2. Who is the father of cloud computing?

- a) Sharon B. Codd b) Edgar Frank Codd
- c) J.C.R. Licklider d) Charles Bachman

3. Which of the following are the features of cloud computing?

- a) Security
- b) Availability
- c) Large Network Access
- d) All of the mentioned

4. Applications and services that run on a distributed network using virtualized resources is known as ____
- a) Parallel computing b) Soft computing
c) Distributed computing d) Cloud computing
5. Which of the following is the Cloud Platform provided by Amazon?
- a) AWS b) Cloudera c) Azure d) All of the mentioned
6. Which of the following monitors the performance of the major cloud-based services in real time in Cloud Commons?
- a) CloudWatch b) CloudSensor c) CloudMetrics d) All of the mentioned
7. Choose the correct relationship of cloud services to customers.
- a) One-One b) One-Many c) Many-one d) Many-Many
8. What does the term “elasticity” in cloud computing refer to?
- a) Ability to scale down
b) Parallel
c) Ability to scale up
d) Both A and C are correct
9. In cloud computing, the client is on which end.
- a) Backend
b) Frontend
c) Depends
d) Both A and B
10. Internal Cloud or Corporate Cloud is also known as ____
- a) Community Cloud
b) Private Cloud
c) Scalability of Cloud
d) Public Cloud
